# WELCOME TO EPISODE 1: INTRO TO ASP.NET CORE!

ASP.NET Core is a new and improved version of ASP.NET that helps developers build websites, apps, and APIs faster and better!

1. Works on any system – Windows, Mac, or Linux.
2. Super fast – Loads web pages quickly and handles lots of users at once.
3. Lightweight & flexible – Use only what you need, making apps more efficient.
4. Open-source & free – Improved by Microsoft and developers worldwide.

Think of it as the upgraded, turbocharged version of ASP.NET! 🚀  
Swipe to see why you should use it!
